

# Purple Window Enterprise Asset Management

***The key of managing enterprise assets is not the assets themselves, but the value they deliver to the enterprise***

An enterprise asset management (EAM) solution enables the tracking of all asset activities and the optimisation of asset utilisation. EAM integrates the entire enterprise across finance, operations, logistics, maintenance and safety.

## Key features include:

- Integrated Asset Lifecycle visibility, control and management.
- Make, model and class classification.
- Best practice templates to simply, standardise and fast-track the creation of contracts and maintenance tasks.
- Preventative, corrective and predictive maintenance.
- Some of the key modules are:
  - Contract Management
  - Maintenance Forecasting
  - Work Order Management
  - Stock Management
  - Finance General Ledger
  - Permits & Warranties
  - Vendor & Trade Agreements
  - Customer Management
  - Mobile workforce
- The solution has been developed in Microsoft's Dynamics AX platform and offer superior scalability, one integrated platform and ease of use.
- A HTML5 based mobile application available for all out of office activities.

# Enterprise Asset Management

One  
modularized  
platform for all  
asset role  
players

## Key benefits include:

- 360° enterprise-wide visibility enables sound asset decisions to drive financial value at every stage of the asset lifecycle
- Increase assets availability and the extension of equipment life
- Increase resource productivity and allocation
- Optimise maintenance, repair, and operations (MRO) inventories and automate the fulfilment of spare parts and supplies
- Track the financial performance of assets
- Up to date information on the total cost of ownership of an asset.
- Keep traceability of assets to increase accountability.
- Benchmark asset management activities against industry best practices
- Keep all the information in one place for timely decisions about assets in order to balance risk, cost, and benefit of assets over their life cycles
- Full cycle Asset compliance and risk management to ensure all assets are within best practice parameters and all OEM and government requirements are met.

## Single-Point visibility

The EAM solution enables all asset life-cycle role players to use one integrated platform - one version of the truth.
