

Purple Window OutSystems Platform

One visual platform for all device development.

Build mobile and cloud applications in one visual development platform.

Key features include:

- OutSystems Platform enables you to develop and deploy apps in the cloud, on-premises or in a hybrid model.
- Develop once, for all devices
- Integrate all your existing systems and applications.
- OutSystems Platform offers a visual development environment.
- Developers can assemble all components necessary to completely define mobile and web apps, without writing any low-level code.
- You'll be able to model User Interfaces, Business Logic, Business Processes, Databases, Integration Components, Web Services, Security Rules and Scheduling activities.
- It includes wizards to automate the integration of databases, library APIs and popular third party applications such as SAP.
- It works with Microsoft Visual Studio and Eclipse.
- The platform provides version control and configuration management.
- Operation teams can monitor and audit running applications.
- Complete dependency analysis across environments and deploying applications

OutSystems Platform

Visualise your User Interface with custom or pre-built User Experience and device templates.

Key benefits include:

- One platform with all the tools to design, develop, deploy and manage applications.
- Develop once for all devices and browsers
- Use the skills and resources you have
- Out of the box application source code available for a rapid start
- Assemble complete applications without writing any low level code
- Existing integrations for most databases and large applications such as SAP & Salesforce
- Reduce development time and resource requirements

Being Mobile is Everything

One visual development platform to build portable mobile and cloud applications.
