360° EAM for Aviation

One modularized platform for all aviation role players

Key benefits include:

- 360° enterprise-wide visibility enables sound aircraft & asset decisions to drive financial value at every stage of the asset lifecycle
- Increase assets availability and the extension of equipment life
- Increase resource productivity and allocation
- Optimise maintenance, repair, and operations (MRO) inventories and automate the fulfilment of spare parts and supplies
- Track the financial performance of assets
- Up to date information on the total cost of ownership of an asset.
- Keep traceability of assets to increase accountability and to ensure flight safety
- Benchmark asset management activities against industry best practices
- Keep all the information in one place for timely decisions about assets in order to balance risk, cost, and benefit of assets over their life cycles
- Full cycle Asset compliance and risk management to ensure all assets are within best practice parameters and all OEM and government requirements are met.

Complete control

The aviation solution enables owners and operators to ensure flight safety by tracking all maintenance significant items and prescribed preventive maintenance
