360° Incident Management

Single-point
visibility of all
incidents and
related
information

Key benefits include:

- Central repository for all reported incidents and their outcomes
- Reduced manual efforts involved in incident management by integration with maintenance and service order systems.
- Detail data available for incident analysis and reporting
- Enables regulatory incident reporting

Total visibility

The Incident Management module drives an incident aware culture and enable the reduction of incident costs by streamlining the incident reporting and subsequent rectification and preventive measure processes.
