MOBILE WORKFORCE

Effective portfolio management must be mobile

The mobile workforce module enables mobility across portfolios, services, maintenance and delivery organisation.

Key Features Include:

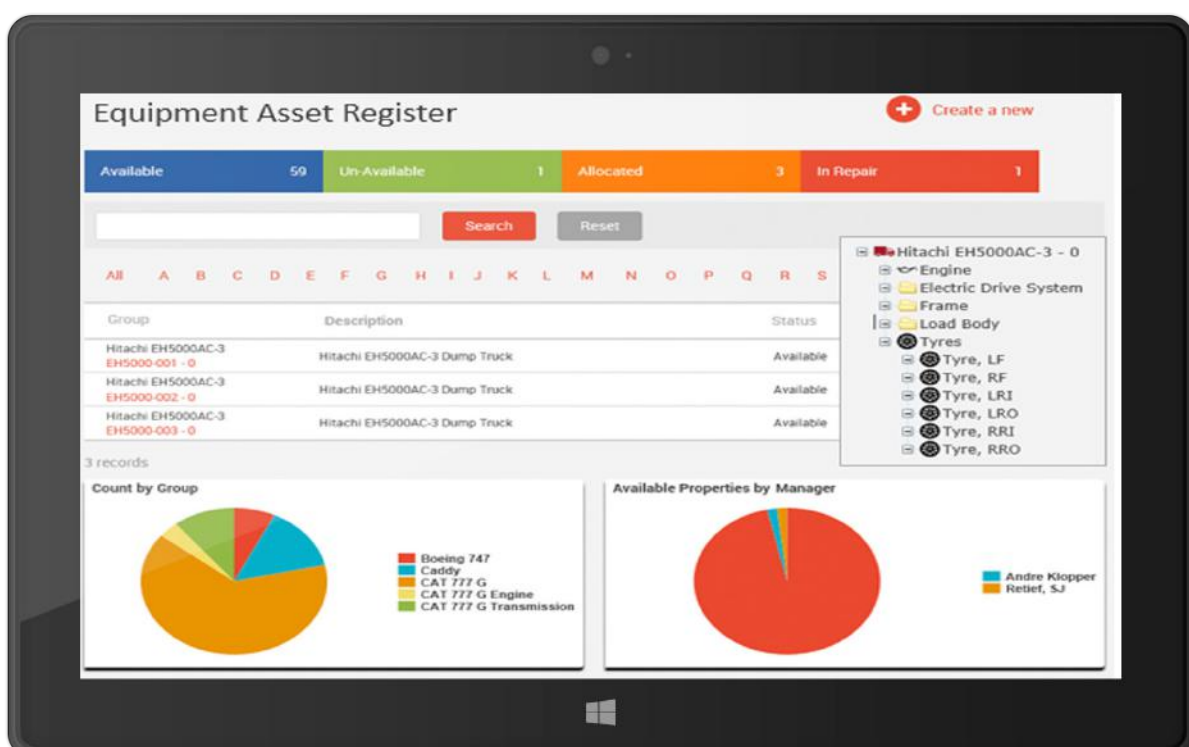

The mobile portfolio manager has visibility of:

- Property inspection and service history
- Lease contract information
- Lease expiry information
- Tenant detail
- Incidents at a property
-

Service and Technical workers can:

- Get notified when new work has been allocated.
- Receive and accept tasks for
- Maintenance
- Inspections
- Safety
- Support
- Cleaning

- Get directed via maps to the specific location.
- Execute tasks, feedback labour, spares and other resources used.
- Get electronic signature for work completed
- Take pictures and attach to work completed.
- Get full history of a property
- Order spares and other support resources via the mobile.

Key benefits include:

- 360° visibility and control of the entire portfolio and workforce.
- Reduce service, inspection and maintenance costs
- Reduce labour costs
- Increase team productivity
- Increase asset utilisation and availability
- Reduce stock levels
- Track key equipment, team KPIs
- Increase asset profitability
- Minimize downtime
- Increase team profitability
- More effective work planning
- The mobile solution is platform independent and runs on any smartphone, tablet or browser.

Being mobile is everything

Competitive Real Estate operations must mobilize portfolio, service and contract teams.
